

Interior Design Business owner- Going around to clients houses and writing everything down on paper. Sometimes i lose the paperwork. Now I dont have to worry about it anymore. Project Helper saves me time and money.

Sewing fabricator- I can use this app at home to keep track of the measurements of my furniture and other household items and the prices. I also love the fact that if i need to go to a client's house, I can do for them just like i can for myself. Plus I can use the internal map to find locations without having to open another app. I cant remember addresses anymore. This app makes things so much easier.

Diy HouseDad- I wanted an app that i can use at home that I could keep track of my household projects. I dont even have to leave my house.
